SERVICES WITH SECURITY AND VISION

Whether on the ground or on the gondola, the safety of our employees always comes first. Quality needs sovereignty and conscientiousness in order to achieve long-term success. That is why we invest in occupational safety and are therefore certified according to the SCC** (Safety Checklist Contactors) and ISO 9001:2015 rules, regulations and audited by DEKRA. Thanks to the high qualification standard, we can carry out highly demanding work on safety and test relevant components and constructions in industrial plants.

As part of ROBUR, ROSCH offers even more: more than 2,000 employees work in the wind, water, energy, industrial and process industries. As expert partners for our customers we create holistic solutions from planning and implementation, to operation and maintenance, to the relocation and decommissioning.
